It's pretty easy to tell the difference
between a 4.0-liter and a 5.2-liter
Jeep. Because the ZJ was heavier than
most Jeeps, the 4.0L was a little
underpowered in the ZJ chassis.
Because of this, many of the ZJ Grand
Cherokees produced came with a
5.2-liter V8. This engine makes more
horsepower and more torque while
still being extremely reliable.

There is a common issue with shifting on a number of Jeep Grand Cherokee models as they age and their mileage increases. The shifting problem usually surfaces when the vehicle is first started and the engine and transmission are cold. You're often still able to drive the vehicle, but it only operates in one or two gears.
