Math 1325 Introduction to Derivatives of e and ln **Algebra An Introduction Hungerford Solutions**

If $ab = 0$, then since a is a unit, then $a^{-1}ab = 0$, so that $b = 0$. But b is a zero divisor, so that $b \neq 0$ and thus $ab \neq 0$. Now, since b is a zero divisor, choose $c \neq 0$ such that $bc = 0$; then $(ab)c = a(bc) = 0$ shows that ab is also a zero divisor. 6. Since n is composite, write $n = ab$ where $1 < a, b < n$.

Abstract Algebra: An Introduction - Complete Solutions ...

Proof: (a) Every element in $\mathbb{Z}(p)$ is of the form $a + pi$ for some $i \in \mathbb{Z}$. In taking the sum of $a + pi$ times we have $a + pi + \dots + a + pi = pi(a + pi) = a + pi \gg 0$; therefore, $(pi)a + pi = 0$. By Theorem-I.3.4, part (iv), the order of $a + pi$ must therefore divide pi , and so by Introduction, Theorem-6.6, (Euclid's Lemma) it must be pn for some $n, 0$.
