A malfunctioning heat pump can result from a myriad of issues. Three commonly reported issues include: Heat pump frozen – In winter, a frozen heat pump might be the result of the defrost cycle not working, the outdoor fan not working, low refrigerant charge, the outdoor unit being physically blocked, or water dripping onto the unit and freezing. A frozen heat pump won't heat, and worse ...

Carrier's 25VNA4 with Greenspeed™ Intelligence is a breakthrough product providing up to 13 HSPF heating efficiency and up to 24 SEER cooling efficiency. The variable speed capacity control results in strong heating capacity as the outdoor temperature drops resulting in less reliance on auxiliary heat. Lower speed operation, when needed in cooling, for enhanced comfort and dehumidification.

[PRODUCT DATA - Carrier](#)

The Infinity 20 heat pump includes Greenspeed intelligence which is created by pairing adaptable-speed technology with our Infinity® control's intelligence. The unique, variable-speed compressor of this unit, when managed by the Infinity control as part of a complete Infinity system, allows it to literally adapt its output to the needs of the home. With infinite adjustments between 40 and 100% capacity, it gives the home only the amount of cooling or heating necessary.

Overview. The Infinity 18VS heat pump is different in a lot of ways. It offers variable-speed compression that can step down in 5 stages to as low as 25% of its capacity. That's huge from a comfort perspective. The ability to run in lower speeds most of the time makes it quieter and more adept at removing humidity in the summer.
