~~Zoey has to help save the Caterfly eggs, which are in danger of freezing in a late cold snap. Her solution causes more problems, and she works with her mom to understand the issue and deal with it. I like how a fantasy series is concerned with the scientific method and reasoning and uses fantasy animals to explain real biology.~~

Three strangers, hungry and tired, pass through a war-torn village. Embittered and suspicious from the war, the people hide their food and close their windows tight. That is, until the clever strangers suggest making a soup from stones. Intrigued by the idea, everyone brings what they have until-- together, they have made a feast fit for a king! In this inspiring story about the strength people possess when they work together, Muth takes a simple, beloved tale and adds his own fresh twist.

Jaxon had just one job--to return three baby dragons to the realm of magic. But when he got there, only two dragons were left in the bag. His best friend's sister, Kavita, is a dragon thief! Kavita only wanted what was best for the baby dragon. But now every time she feeds it, the dragon grows and grows! How can she possibly keep it secret? Even worse, stealing it has upset the balance between the worlds. The gates to the other realm have shut tight! Jaxon needs all the help he can get to find Kavita, outsmart a trickster named Blue, and return the baby dragon to its true home. From Emily Calandrelli—host of *Xploration Outer Space*, correspondent on *Bill Nye Saves the World*, and graduate of MIT—comes the first novel in a brand-new chapter book series about an eight-year-old girl with a knack for science, math, and solving mysteries with technology. Ada Lace—third-grade scientist and inventor extraordinaire—has discovered something awful: her neighbor's beloved Yorkie has been dognapped! With the assistance of a quirky neighbor named Nina (who is convinced an alien took the doggie) and her ever-growing collection of gadgets, Ada sets out to find the wrongdoer. As their investigation becomes more and more mysterious, Ada and Nina grow closer, proving that opposites do, in fact, attract.
