Recent megatrends such as increasing complexity, volatility, internationalization and increased demand for transparency and compliance have changed the expectations towards the controlling function. During his professional experience, the author observed the increased expectations towards the controlling function. If controlling is to maintain its influence in a company, it needs to adapt to the changes in management expectations. To outline "how to increase the value added by the controlling function in multinational production companies", four research questions were addressed and answered. The questions which were answered were "what does controlling involve and which factors influence the set-up of the controlling function in a company", "how are the expectations towards the controlling function changing over time and what is its value contribution", "how can the controlling function add value to standard reporting and budgeting activities" and "how can the controlling function add value to reorganization activities".

Personalcontrolling auf dem neuesten Stand Die Aufgaben des Personalcontrollings sind vielfältig – von strategischer und operativer Personalplanung über Budgetierung, Personalforecast und Personalrisikomanagement bis hin zur personalwirtschaftlichen Beratung reichen die inhaltlichen Schwerpunkte. Einen guten Überblick über das Anforderungsspektrum bietet das von den Controlling-Experten Rita Niedermayr, Silke Wickel-Kirsch und Mirko Waniczek entwickelte Prozessmodell, das sämtliche Aufgabenfelder bzw. Hauptprozesse des Personalcontrollings übersichtlich darstellt und grafisch veranschaulicht. Prozess-Templates dokumentieren Zielsetzung, Inhalte und Schnittstellen für jeden dieser Hauptprozesse. Das Modell fördert ein besseres Verständnis der Prozessverantwortlichen und der Teilnehmer für ihre Beiträge und dient als Grundlage für die Zuordnung von Aufgaben, Kompetenzen und Verantwortung. „ Personalcontrolling-Prozessmodell “ eignet sich daher als Bezugsrahmen für Unternehmen und Organisationen, die ihr Personalcontrolling auf den neuesten Stand bringen wollen. Die zweite Auflage beinhaltet wesentliche Weiterentwicklungen sämtlicher Prozesse im Kontext der Digitalisierung. In managerial literature the challenges of ramping-up, growing and enhancing a (Finance) Shared Services Organization are regularly neglected. Therefore, the compilation will address two objectives: First, based on a generic phase model of an SSO ' s development, frequently arising questions related to the management of SSOs shall be systematically discussed and practicable solutions derived. Susanne Rauscher and Annika Zielke provide an in-depth analysis of the relevance of nudging as a potential solution approach for behavioral issues within the area of Management Accounting. It challenges whether learnings from already successful applications of nudging especially in the social and political context can be transferred to the corporate environment of management accounting. This study contributes to the increasing interest in behavioral economics in the corporate context. Its findings have the potential to impact both academic research and practitioners ' work.

Service firms have high overhead costs which are difficult to assign to individual services. To bring transparency to their value chain, they need costing approaches that help them find their own improvements. Markus B. Baum explores current theory and practice of value chain approaches and cost accounting to develop a costing approach with a suitable instrument for the allocation of fixed and overhead costs for a service firm. He describes the service business costing (SBC) approach. This hybrid-costing model has a hierarchical structure in terms of consolidation and allocates cost and revenues on the lowest hierarchical level possible to ensure that all costs and income are assigned to activities from which they originated.
