A New York Times bestseller. "A funny, intimate, and often jaw-dropping account of life behind the scenes." —People Nurses is the compelling story of the year in the life of four nurses, and the drama, unsung heroism, and unique sisterhood of nursing—one of the world's most important professions (nurses save lives every day), and one of the world's most dangerous, filled with violence, trauma, and PTSD. In following four nurses, Alexandra Robbins creates sympathetic characters while diving deep into their world of controlled chaos. It's a world of hazing—"nurses eat their young." Sex—not exactly like on TV, but surprising just the same. Drug abuse—disproportionately a problem among the best and the brightest, and a constant temptation. And bullying—by peers, by patients, by hospital bureaucrats, and especially by doctors, an epidemic described as lurking in the "shadowy, dark corners of our profession." The result is a page-turning, shocking look at our health-care system.

This comprehensive workbook is an indispensable aid for emergency room nurses preparing for the CEN exam. The book contains over 1,400 questions and answers in an easy-to-use two-column format—questions in the left column, correct answers and rationales in the right. A bound-in CD-ROM contains over 300 additional questions. Coverage encompasses all subject areas in the CEN exam blueprint, and includes 5-tier triage, ECG strips, long-term complications of ED care, disaster management, and recognition and emergency management of chemical and biological weapons of mass destruction. The book includes sample tests with 175 questions, weighted according to the CEN exam blueprint.

"This text provides a comprehensive overview, if not thesis, of the contributing factors to workplace stress and how to revisit [them] and our own mental health. How can nurses and health care workplaces expect to offer health and healing when such basic foundational human dynamics of mental health are not addressed? This work opens the door to both the dynamics and the deep dimensions of the root issues facing humanity and our places of work and play." ó Jean Watson, PhD, RN, AHN-BC, FAAN (From the Foreword) "This is a wonderful addition to leadership and management personnel and a good resource for any nurse. Too often nurses hide these issues and we need to make others aware of what can occur and take steps to bring these conditions out in the open. It is definitely a worthwhile addition to any nursing library...
