Globalization And Its Effect On

Globalization is an elimination of barriers to trade, communication, and cultural exchange. The theory behind globalization is that worldwide openness will promote the inherent wealth of all nations. While most Americans only began paying attention to globalization with the North American Free Trade Agreement (NAFTA) debates in 1993.

What Is Globalization and What Are Its Effects?

Globalization in its basic economic sense refers to the adoption of open and unfettered trading markets (through lowering of trade barriers, removal of capital controls, and liberalization of foreign exchange restrictions). Large volumes of money movement, increased volumes of trade, changes in information technology and communication are all integral to a global world.
