This radical analysis of the role and importance of historiography interprets the philosophy and theory of history on the basis of historicity as a human condition. The book examines the norms and methods of historiography from a philosophical point of view, but rejects generalisations that the philosophy of history can provide all the answers to contemporary problems. Instead it outlines a feasible theory of history which is still radical enough to apply to all social structures.

Historiography and historical theory are often perceived as complex subjects, which many history students find frustrating and difficult. Philosophical approaches, postmodernism, anthropology, feminism or Marxism can seem arcane and abstract and students often struggle to apply these ideas in practice. Starting from the premise that historical theory and

Practising historians claim that their accounts of the past are something other than fiction, myth or propaganda. Yet there are significant challenges to this view, most notably from postmodernism. In *Historical Theory*, a prominent historian develops a highly original argument that evaluates the diversity of approaches to history and

points to a constructive way forward. Mary Fulbrook argues that all historians face key theoretical questions, and that an emphasis on the facts alone is not enough. Against postmodernism, she argues that historical narratives are not simply inventions imposed on the past, and that some answers to historical questions are more plausible or adequate than others. Illustrated with numerous substantive examples and its focus is always on the most central theoretical issues and on real strategies for bridging the gap between the traces of the past and the interpretations of the present. Historical Theory is essential and enlightening reading for all historians and their students.

To traditional historiography Rüsen brings theoretical insights from philosophy, narrative theory, cultural studies, and the social sciences, developing an intricate but robust model of “historical thinking” as both a cognitive discipline and a cultural practice—one that is susceptible neither to naïve empiricism nor radical relativism.
