how to revitalize eureka nicad battery nicd fix

The positive plates inside a nicad battery are made from a porous plaque on which has been deposited a thin coating of nickel hydroxide, and the negative plates are made with cadmium hydroxide. The plates are separated by a strip of porous plastic, and they are sealed in a cell that is filled with a 30% solution of potassium hydroxide, which acts as the electrolyte.

Recondition a NiCAD Battery | Sciencing

You can't replace your NiCad pack with a lithium pack, however, you likely can fix your existing pack, saving you money versus getting a NiCad replacement. Charge your NiCad battery pack. Connect it to the device it powers after the pack is fully charged. Turn on your device and let it operate until it stops.
