~~I Heart Logs Event Data Stream Processing And Data ...~~

“I Heart Logs” author explains that a data source could be an application that logs events or a database table that logs modifications. Subscribers could be any kind of data system, such as a database or a cache. You need to extract log information from its origins and then load it into a distributed streaming platform. Subscribers then consume information from the distributed streaming platform.

~~I Heart Logs, But Still Have to Live With Them: A Log ...~~

Last week, after posting a review of Designing Data-Intensive Applications by Martin Kleppmann, fellow InVision engineer - Ben Darfler - recommended that I take a look at I Heart Logs by Jay Kreps. After making my way through Kleppmann's magnum opus, I Heart Logs was an easy and welcome read that I got through in just three sittings.
