Logos es una palabra de origen griego que puede ser entendida de varias formas: puede referirse a la argumentación por medio de las palabras, o puede referirse al pensamiento o la razón. Uno y otro significado se relacionan estrechamente. Sin embargo, los matices dependerán, en gran medida, del contexto de enunciación de la palabra, ya que su traducción literal resulta huidiza.

This book "offers a rich, high-quality selection of up-to-the-minute logos that readers have come to expect. But the focus of the publication has been further sharpened from a comprehensive documentation to a competent classification of prevailing tendencies in design. In addition to illustrating the various co-existing design approaches and trends that are shaping logo design today, and will continue to influence it in the coming years, the book showcases outstanding work by noted designers in short text features. 'Los Logos: Compass' aims to be not only an archive of current design, but to educate designers and clients about which approaches make the best fit for a given project independent of the latest trends. This issue is especially important in a challenging economy in which innovation and identity are essential." - product description.

Struggles over space and resistance to geographic displacement gave birth to much of Chicano history and culture. In this pathfinding book, Raúl Villa explores how California Chicano/a activists, journalists, writers, artists, and musicians have used expressive culture to oppose the community-destroying forces of urban renewal programs and massive freeway development and to create and defend a sense of Chicano place-identity. Villa opens with a historical overview that shows how Chicano communities and culture have grown in response to conflicts over space ever since the United States' annexation of Mexican territory in the 1840s. Then, turning to the work of contemporary members of the Chicano intelligentsia such as Helena Maria Viramontes, Ron Arias, and Lorna Dee Cervantes, Villa demonstrates how their expressive practices re-imagine and re-create the dominant urban space as a community enabling place. In doing so, he illuminates the endless interplay in which cultural texts and practices are shaped by and act upon their social and political contexts.

Expanding on "Los Logos" and "Dos Logos," this volume demonstrates how influences from illustration and street art have become increasingly evident in logo design. Full color.

Michael T. Coughlin theorizes the possibility of interpreting art and architectural form as an index for Logos in Early Modern Italy, while simultaneously proposing a theory about the origin of Freemasonry from a historical perspective.

use in their projects. Through real world examples and illustrations, the authors present the work of the 20 legends focusing on the subject of identity and logos. This ranges from simple mark-making to full scale programs applied to multiple mediums. The book also includes a gallery of marks, sidebars on heroes and inspirations, and diagrams to explain concepts or processes. The designers included will have a wide age range, type of work, in-house agencies, small business, large firm, domestic and international designers. Each profile is about 2,000 words and includes 10-15 projects with captions that detail the specifics. We include current projects as well as the projects that put these people on the map.

"The written word" typically brings to mind an active engagement with books, magazines, and journals, whether printed or digital. But those of us in towns and cities are constantly engaged with another type of written word--the typography of streets, of the urban experience. Wherever there are businesses, apartment buildings, streets, or subway stations, there are names on signs, and each sign represents dozens of design decisions: colors, fonts, sizes, and so on. Together, these decisions contribute volumes to the character of the cities and streets where they appear, reflecting, often on a subconscious layer, the local culture and social history, the commercial environment and the daily ecology. Street Typography examines this aspect of place through two approaches: academic articles written by scholars and an exposition of street typography by designers and artists from all over the world.
