unique properties that arise from the nature of the visual-gestural modality. The major goals are to bring to light critical issues related to the study of classifier constructions and to present state-of-the-art linguistic and psycholinguistic analyses of these constructions.

Perspectives on Classifier Constructions in Sign Languages ...

vehicle and the direct focus of the watcher's attention. In signing a sign language, the sign producer becomes still further detached, so that the sign language system plays a larger role-as in all languages, there is a sharing of control between the individual and the system (89). The term "nonverbal" is rarely used in the research here reviewed, but

Introduction to form, structure and language in Dr Jekyll ...

ASL and other sign languages have all the same structural underpinnings that spoken languages do. Five major components of the structure of language are phonemes, morphemes, lexemes, syntax, and context. These pieces all work together to create meaningful communication among individuals. Major levels of linguistic structure

Sign Languages edited by Diane Brentari

Abstract. Chinese grammar exhibits typological features shared by sign languages and young creole languages. Furthermore, like sign languages, Chinese, as much as possible, contextualizes the knowledge of the world, thereby simplifying the syntactic structure and allowing relatively free word order and argument selection.

The Nature of Chinese Grammar: Perspectives from Sign ...

No sign language was used by humans in Loulis' presence for five years and yet Loulis was able to learn over 50 signs through her association with Washoe. This demonstrates the property of cultural transmission, i.e. the chimps continued to use sign language and pass this on to other chimps without any input from humans.

Innate Ability for Language Acquisition

The title of this book, Sign Language Research, Uses And Practices, wants to reflect both the fact that the papers included relate to sign language research on structure, uses and practices, and our belief that sign linguistics cannot be separated from Deaf community practices, including practices in education and interpretation. Furthermore, in our opinion, there is a (strong) relationship between the uses and practices of sign languages on the one hand, and sign language structure and ...
