pharmacotherapy in primary care

The introduction of pharmacotherapy services within GP practices in Scotland is one of the priorities for the transformation of primary care over the next three years. By 2021 pharmacists, pharmacy technicians and assistants will be embedded members of the GP practice teams delivering core and additional elements of the pharmacotherapy service.

In rural communities where pharmacotherapy may not be available in primary care practices, telemedicine-based treatment with providers outside the immediate area can serve as a 2-3 year bridge, supporting patients in their recovery while allowing PCPs to become trained in pharmacotherapy and integrate care management into their practices. A bridge program also supports SUD treatment programs ...
