List of plants used for smoking - Wikipedia

Smoke is seen hovering over much of western North America and central Canada. Much of the smoke and associated pollution rises high into the atmosphere, where it does not pose an immediate threat to people. For example, the carbon monoxide released from California fires drifted high in the atmosphere toward eastern North America. (Eastern areas are more likely to be affected at the surface, as winds bring the pollutant back down.)

The beautiful opium poppy is native to Turkey and is a common garden plant in the United States. When the unripe seed capsules are cut, they exude a milky latex that is the source of raw opium and can be processed into morphine, codeine, and heroin. Known as opiates, these drugs exert their main effects on the brain and spinal cord.
