Between 1940 and 1945, large

The Light Tank M3 and M5, known as the General Stuart, was the first tank used by American forces in armored combat during WWII. Like its predecessor the M2A4, the Stuart was armed with a 37mm M5 main gun. It also carried up to five Browning

machine guns and 7500 rounds of ammunition. The M3 version sported radial aero-engines, replaced in the M5 with smoother, cooler twin Cadillac automobile engines. The M5 also featured improved sloped armor and had the driver's hatches moved up top. In the European Theater, where
