Tracker. The very word evokes images of buckskin-clad braves crouching over the ground, carefully studying the signs before them—a part of history. But the modern world has not put behind it the need for the earthy business of tracking. Such skills are still routinely used by the military, rescue personnel, and law enforcement, as well as by hunters and people living at subsistence level throughout the world. Tracking Humans is the ultimate authoritative guide to this most complex pursuit. A great resource for military, law enforcement, and rescue professionals, Tracking Humans is also useful for outdoor enthusiasts. Users will find it invaluable as an on-site manual to assist in any ongoing search. Unlike many tracking manuals, this guide focuses on tracking humans, whether they're enemy combatants or lost children. Author David Diaz explains what it takes to be an expert tracker, from the physical stamina to the focus and perception necessary to do the job correctly. He explains the tools of the tracker and presents essential safety tips every tracker should know. Tracking Humans is an important tool for anyone dealing with missing persons—it could be an essential lifesaver.

Mastering the illusion of invisibility isn't a lost art or one solely for indigenous tribes or elite special forces teams. In this follow-up to Tracking Humans: A Fundamental Approach to Finding Missing Persons, Insurgents, Guerrillas, and Fugitives from the Law, military professional David Diaz turns the tables and lays out fundamental and unconventional tactics and techniques for maintaining a low profile and evading capture. Diaz applies a fundamental systematic approach to the science of eluding humans, guiding the reader through topics such as the following: - The history of Antitracking - Modern technology - Individual responsibilities - Use of the senses - Coordination and support - Tricks and treats techniques (Style) - Movement tactics (Methods) A compelling fiction tale of smugglers evading border patrol along the US-Mexico line weaves through the chapters of this field guide to illustrate each lesson, creating a must-have tool for military, law enforcement, wilderness rescue professionals, or the outdoor enthusiast. Whether you're a beginner or an accomplished tracker, this intuitive and revealing resource demystifies the art of creating the illusion of invisibility. This book will absolutely save lives and help you find people, and most certainly lose them if you must...I am sure of that!-Scott Southard, US Army Special Forces, retired, CEO, Peak Performance Consulting LLC

Revised and updated with color photographs, the classic guide to search and rescue. In 2012, there were 661,000 missing person cases opened in the United States. While the majority of missing person cases that get opened are closed quickly, by the end of the year over 2,000 remained unresolved. In many instances, when the missing person is lost in the woods, or in the desert, search and rescue missions become an essential tool that can mean the difference between life and death. Fundamentals of Mantracking is the essential guide written by the people who spent most of their lives developing and refining the art of tracking, one of the most important but often overlooked aspects of successful search and rescue missions. Inside, you will find the history of tracking, information on how to tell when tracking becomes necessary, recommended equipment and tools, and hundreds of indispensable examples of what to do on your way to becoming an expert tracker. Originally released in 1990, the revised and updated edition of Fundamentals of Mantracking includes dozens of color photographs and detailed illustrations, making it the one book essential to anyone interested in learning how to track, or committed to becoming the best tracker possible. Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports—books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team. In addition to books on popular team sports, we also publish books for a wide variety of athletes and sports enthusiasts, including books on running, cycling, horseback riding, swimming, tennis, martial arts, golf, camping, hiking, aviation, boating, and so much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Our eye movements in response to visual stimuli reveal much about how we experience the world. Focusing on the latest developments in the multidisciplinary field of eye tracking research, this volume ranges across a wide spectrum of research applications, with four sections covering the plethora of practical uses to which our expanding knowledge can be put. They offer abundant evidence that eye tracking research and its methodologies offer new ways of collecting data, framing research questions, and thinking about how we view our world. As a result, we are discovering more about how the visual system works, as well as how it interacts with attention, cognition, and behaviour. Current Trends in Eye Tracking Research presents the work of more than 50 researchers and academics, showcasing groundbreaking studies and innovative ways of applying eye tracking technologies to interesting research problems. The book covers the current output of a number of pioneering research laboratories, detailing their work on eye tracking and the visual system, alignment and EEG data, marketing and social applications, and eye tracking in education. Featuring creative uses of existing technology as well as inventive implementation of new technology in a range of research contexts and disciplines, this new publication is compelling proof of the growing importance of this exciting and fast-moving area of scientific endeavor.

The 33rd Annual German Conference on Artificial Intelligence (KI 2010) took place at the Karlsruhe Institute of Technology KIT, September 21–24, 2010, under the motto “ Anthropomatic Systems. ” In this volume you will find the keynote paper and 49 papers of oral and poster presentations. The papers were selected from 73 submissions, resulting in an acceptance rate of 67%. As usual at the KI conferences, two entire days were allocated for targeted workshops—seventh this year—and one tutorial. The workshopand tutorial materials are not contained in this volume, but the conference website, www.ki2010.kit.edu, will provide information and references to their contents. Recent trends in AI research have been focusing on anthropomatic systems, which address synergies between humans and intelligent machines. This trend is emphasized through the topics of the overall conference program. They include learning systems, cognition, robotics, perception and action, knowledge representation and reasoning, and planning and decision making. Many topics deal with uncertainty in various scenarios and incompleteness of knowledge. Summarizing, KI 2010 provides a cross section of recent research in modern AI methods and anthropomatic system applications. We are very grateful that Josef Edelmann, Hans-Hellmut Nagel, Carl Edward Rasmussen, and David Vernon accepted our invitation to give a talk.
